EDUCATION

LJ Institute of Engineering & Technology — Ahmedabad, India
Bachelor of Engineering in Computer Science & Engineering | CGPA: 8.34/10.0 — *June 2022 – June 2025*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frontend Technologies: React.js, Angular, Bootstrap, Tailwind CSS
Backend & Database: Node.js, Express.js, MongoDB
Full-Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js)
Tools & Libraries: Git, RESTful APIs, JWT Authentication, Multer, Google Maps API

EXPERIENCE

Software Developer Intern — April 2025 – June 2025
Mangalyam Technolabs LLP — *Ahmedabad, India*
- Developed and maintained full-stack web applications using MERN Stack (MongoDB, Express.js, React.js, Node.js) for client projects
- Built dynamic and responsive web interfaces collaborating with cross-functional development teams
- Integrated RESTful APIs, optimized database queries, and enhanced application performance through code optimization
- Implemented version control workflows using Git and followed deployment best practices for production environments
- Applied industry-standard coding practices and received mentorship to strengthen full-stack development expertise

Frontend Developer Intern — April 2024 – September 2024
PropLegit Pvt Ltd — *Ahmedabad, India*
- Developed responsive web applications using Angular, TypeScript, HTML, CSS, and JavaScript for real estate solutions
- Implemented dynamic UI components with state management to enhance user experience and interface responsiveness
- Debugged and resolved frontend issues, improving application performance and reducing load times
- Integrated RESTful APIs within Angular applications and managed application state effectively
- Awarded "**Best Employee of the Month**" in September 2024 for outstanding contributions and performance

Web Development Intern — December 2023 – January 2024
Codsoft — *Remote*
- Completed web development projects using HTML, CSS, and JavaScript, earning certification for proficiency
- Designed and deployed a dynamic portfolio website showcasing technical projects and development skills

PROJECTS

E-commerce Web Application | *React.js, Node.js, Express.js, MongoDB, JWT, Google Maps API*
- Built a full-stack e-commerce platform with product browsing, cart management, and secure user authentication using JWT
- Integrated Google Maps Autocomplete API for address validation and autofill during checkout, enhancing UX
- Developed RESTful APIs for authentication, product management, and cart operations with role-based access control for admins
- Implemented image uploads using Multer, lazy loading for improved dashboard performance, and push notifications for mobile/desktop users

Rodic Healthcare Automation – Hackout 2023 | *DAIICT Hackathon* | *Top 10 Finalist*
- Designed and prototyped an automated system for prescription handling and medicine inventory management in healthcare
- Developed a working model within 24 hours demonstrating operational efficiency improvements for healthcare workflows
- Selected as **Top 10 team** from 100+ entries and presented solution to Rodic Healthcare's evaluation panel
